

Cool Japan High-Tech Vending Machine Smart vendor

© MANGAEGG Entertainment Co., Ltd.

In Japan there are 2,480,000 drink vending machines...
2,480,000 Machines!!
 There are so many!

If you include cigarette, food ticket, and frozen food machines then it's 3,650,000.

But there are even vending machines with more interesting stuff like soccer balls or dashi. (soup stock)

That's ridiculous... although I would probably buy a soccer ball...

Minh look! This is what I've been dreaming of seeing, the scramble crossing!

Shibuya! It's so cool! It's so cute!

Uhhg... I'm so thirsty...

I told you you're getting too worked up. Maybe there's a vending machine...

Ah ha! There's one!

I want to try some Japanese tea!

Japan is so high tech and amazing! Don't you think...?

JAPAN

But that's not all, young, sweet Minh...

It is this great country...

...which has a vending machine that uses face recognition software to see your age and gender to offer the perfect products for you.

How far does this rabbit hole go?!

Huh?? What's this?!

It's selling bananas!!

Oh ho, this is it...!

This is one of those awesome Japanese vending machines! A rare one!

Leave it to Zija... So Japan's vending machine mania was actually real?

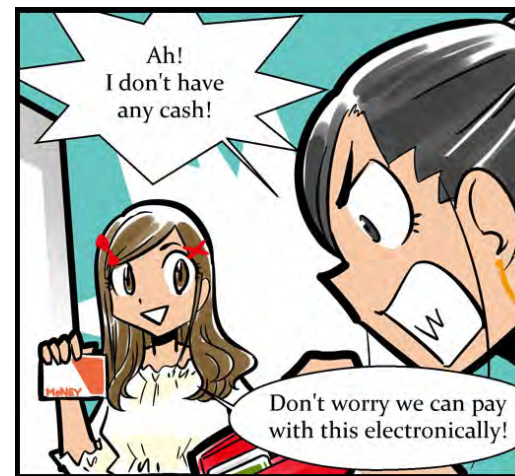

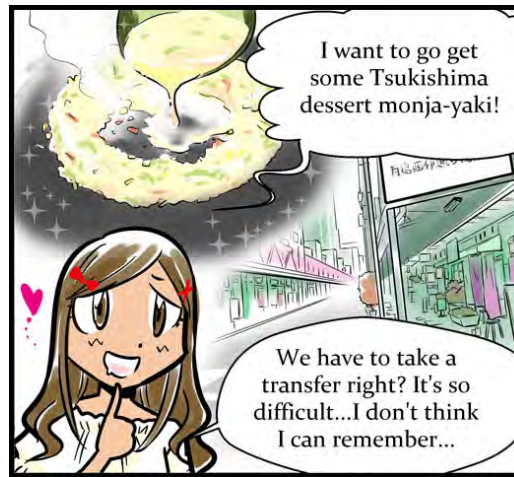

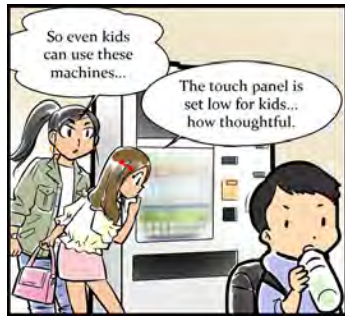

I was actually able to buy one! This is so convenient!

For foreign tourists like us that kind of machine is the stuff of science fiction!

I wonder if there's one nearby?

Here's one!

This is it! A smart-vender!

The End
